

Training Visit Report - Cooper

Date: 10/29/19	Time of Visit: 10:00-11:00am
----------------	------------------------------

Notes

Worked with Cooper on foundation behaviors to pay attention to handler when walking on a leash. Worked on loose leash walking and used “watch me” to focus. Worked inside garage without distractions and in back yard for a slightly more distracting environment.

Cooper did great! He’s very responsive and loves to learn. He was so intent on the training that he didn’t jump on me or get too excited to pay attention. The high value treat (beef) really got his attention.

Instructions

It will be helpful if you can continue to avoid on-leash walks if there is a high likelihood that you will run into other dogs. If this does happen, as calmly and quickly as possible go the other way in order to put as much distance as possible between Cooper and other dog. Cooper did get a lot of treats today so on future training days, it would be a good idea to feed a little less to keep his weight down.
