

Training Visit Report for Cooper

Date: 11/5/19	Time of Visit: 10:00am – Training Day 4/9
---------------	---

Notes

Took Cooper to Mountain View Cemetery so we could see dogs from a distance and practice “this way” and turn around. Gave high value treats after turning. Did a lot of loose leash walking around cemetery and saw 4 dogs without Cooper being reactive. Once at home, practiced having Cooper laying next to me quietly while I sat at the table and bar in kitchen – reinforced quiet, calm behavior.

Cooper is really catching on to checking in with his person while on walk. He also does an automatic about turn when using “this way”. He loves training and is getting better at calming down more quickly in beginning of session. He didn’t bark for attention and sat quietly while I pretended to read the paper.

Instructions

Continue to work on exercises given last week. Continue to try to keep other on-leash dogs at least 30-50’ away when possible. Reinforce him for quiet, calm behavior in the house.
